

# Fowler

## Parallax Free Outside Inch Micrometers

### **Parallax Free**

*Unique thimble design with graduations on one plane reduces reading errors!*

Quick reading micrometer with a special parallax free spindle and sleeve. Easier to read than standard vernier micrometers, the barrel is graduated in 0.001" with a tenth reading vernier.

- Insulated steel frame
- Carbide tipped jaws
- Resolution: 0.0001"
- Micro-lapped measuring faces
- Ratchet spindle with lock
- Clearly marked graduations
- Satin chromed thimble and sleeve
- Insulated plates on the frame prevent changes in readings due to temperature fluctuation.
- Includes fitted storage case
