

## Universal Dial Protractor

Used widely by machinists, toolmakers, draftsmen, and mechanics, Fowler introduces the Universal Dial Protractor with 12" blade.

- Easy to read, each dial revolution equals  $5\frac{1}{2}$ . Inspection window reads a full  $360\frac{1}{2}$  with four 0— $90\frac{1}{2}$  sections.
- Blades are beveled  $45\frac{1}{2}$  on one side and  $60\frac{1}{2}$  on other side.
- One rotation of pointer shows an angle range of  $5\frac{1}{2}$ . Each angular degree is subdivided into 12 divisions so that each division means an interval of 5 minutes.
- Wide spaced graduations.
- Hardened stainless steel construction throughout with a satin chrome finish.
- Includes acute angle attachment and wood case.
- Positive lock lever.

Order No.  
52-446-012
