

# Fowler

## Micro & Universal Bevel Protractors

#52-447-000 Fowler's Universal Bevel Protractor is functional and easy to use.

- Measures a full 320° range.
- Hardened stainless steel.
- For measuring inner and outer angles.
- Furnished with a bevel-edged extension blade.
- Roller-knob. Fine adjustment.
- Microfine graduations on a satin chrome matte finish.
- Two minute vernier.

▲ #52-447-000

#52-448-612 Fowler Micro Protractor is a high precision angle gage with accurate worm gears. Eliminates intricate handling formerly needed with conventional vernier protractors. Recommended for use in gaging machines, metal patterns, layout work and installations.

- Minimum reading: 1 minute.
- Micrometer graduation: 1 minute per graduation (1 degree per revolution).

- Measures a full 360° angle range.
- Round design for easy handling. Gage automatically locks when not in use.
- Hardened stainless steel construction prevents rust which ensures long life.
- Speedy set ups save time and money
- Blades beveled 45 and 60°.
- Built-in powerful magnifier make microfine graduations easy to read.
