

Fowler

Toolmaker Universal Measuring Set

The Fowler Toolmaker Universal Measuring Set is ideal for the apprentice to start adding to his tool inventory. Set consists of "One-Rev" Dial Caliper, a 0-1" Micrometer and a Flexible 6" Rule. This set is also recommended for school shops and training programs for future tool-makers and machinists.

Special Features—#52-008-006:

- "One-Rev" Dial Caliper reads in .001" graduations.
- Dial features 0-100 dial graduations. Each revolution = .100".
- Outside, inside and depth measurement.
- Reversed covered rack prevents excess dirt accumulation in rack gear teeth.
- Hardened stainless construction, thumb-wheel, locking screw & satin chrome finish.

Special Features—#52-234-000:

- 0—1" Micrometer finished in satin chrome with insulators.
- Carbide-tipped measuring surfaces.
- Accuracy .0001" and graduation .0001".
- Ratchet thimble for exact readings.
- Anvil and spindle hardened and precision ground with micro-lapped carbide on tips.
- Features a positive lever locking clamp.
- Wrench included with micrometer.

Special Features—#52-300-006:

- Flexible 6" Scale is fully hardened with satin chrome finish.
- Features 5R graduations: 32nds, 64ths, 10ths and 100ths.
- Scale is 1½" wide and .015" thick.
- Includes fitted case.
