

### Fast • Easy • Accurate

Now eliminate guesswork and costly downtime. Fowler has designed two complete sets containing everything you will need to calibrate your own calipers or micrometers

Made in the USA of the finest quality materials, these sets include—

- NIST traceable certificates
- Calibration procedures conforming to ISO 9002, ISO/IEC Guide 25 Mil-Std 45662A, ANSI/NCSL Z 540-1-1994 & ISO 10012-1.
- Foam-nested case.

#### # 53-698-000 Caliper Calibration Set

- Used for checking outside jaws, inside jaws and parallelism of jaws.
- Lapped faces are accurate within  $\pm .0002$ " from nominal. Black-oxidized steel to prevent corrosion.
- 1—6" range in 1" increments for outside jaws.
- .5—4.5" for inside jaws.

#### #53-695-000 Micrometer Calibration Set

- Used as a tool crib master, calibration master or QC standard to check load and parallelism of micrometers.
- Range 0—1".
- Stainless steel, hardened, stabilized, ground and lapped to  $\pm .0001$ ".
- .1, .2, .3, .4, .512, .6, .762, .8, .9+1" sizes.

Order No.	Description
53-695-000	1" Micrometer Calibration Kit
53-698-000	6" Caliper Calibration Kit
