

Fowler

10X Pocket Optical Comparators

NEW!

▲ Illuminator Attachment #52-665-006
shown with #52-664-009

Fowler's new 10X Pocket Optical Comparator magnifies images which are sharp, undistorted and free of aberrations. Convenient for checking angles, thread measurements, hole sizes and more. This 10X comparator is widely used by machinists, toolmakers and inspectors in the industry.

Special Features:

- Scales are photo-etched into a glass reticle which is placed in actual contact with the measured object, obtaining simultaneous enlarged images of the scale.
- Reticles (protected in individual plastic cases) are easily interchanged by a screw-in mount. Measures radii, diameters, angles, hole sizes, pitch and thicknesses.
- With the illuminator attachment, the comparator converts into a self-contained illuminated measuring magnifier.

Order No.	Description
52-664-001	10X Comparator with #54-661-009 reticle.
52-664-009	10X Comparator with 9 reticles.
52-665-006	Illuminator attachment only (requires 2 "C" size batteries).
52-661-001 to 009	9 reticles individually priced.
